

## Components for test stands

## Dr.-Ing. S. Haußmann Industrieelektronik

The Company – Dr.-Ing. S. Haußmann Industrieelektronik – was founded by Dr.-Ing. Siegfried Haußmann in Nürtingen, a small city close to Stuttgart, in the year 1981.

In close cooperation with an attached engineering company, founded 1999, which is focused on the development, design and software engineering, we develop and manufacture components for transmissions and engine test beds in the automotive industry.

We offer the complete range of services from design and development, manufacturing to the commissioning of the systems.

We are constantly exploring new paths to offer the best practical solutions for our customers.

### Our activities

Dr.-Ing. S. Haußmann Industrieelektronik designs and manufactures components for test beds in the automotive industry and its suppliers. Our products are used on test beds in R&D departments as well as in the production - applications where quality and reliability in harsh environments are crucial.

Based on many years of experience we offer innovative solutions for the automotive and production industry. Customized designs and project developments complement our range of services.

Renowned manufacturers of cars, commercial vehicles, motorcycles and numerous suppliers rely on our products:

- Gearshift robots and equipment
- Clutch actuation
- Throttle actuation
- Battery simulation
- Customized products and developments
